EDUCATION

University School of Information, Communication and Technology (USICT), GGSIPU — Delhi, India
Bachelor of Technology in Computer Science Engineering (CGPA: 8.0+) — 2024 – 2028

Senior Secondary (CBSE) — 2024
Secondary (CBSE) — 2022

TECHNICAL SKILLS

Languages	Python, C/C++, JavaScript, HTML5, CSS3
Frameworks & Libraries	React.js, React Native, Node.js, Express.js, FastAPI
Tools & Databases	MongoDB, Docker, Git, GitHub, VS Code, Expo EAS
Cloud & Deployment	Vercel, Render, GitHub Actions
Core Fundamentals	Data Structures & Algorithms, RESTful APIs, OOP, UI/UX Design

EXPERIENCE

Software Engineering Intern — 2026
All India Council for Technical Education (AICTE) — *New Delhi, India*

- Built and deployed an AI smart farming platform using **React Native, FastAPI, and Docker**, integrating an **XGBoost** model to predict crop yields from **14 soil and weather parameters**.
- Developed secure **RESTful APIs** with **JWT authentication** in **Node.js**, integrating real-time weather datasets and automating mobile CI/CD pipelines via **GitHub Actions** and **Expo EAS**.

Frontend Developer — 2025-2026
Annual Cultural Fest Website — *New Delhi, India*

- Collaborated with a cross-functional team to build responsive, accessible web pages using **HTML5, CSS3, and JavaScript**.
- Converted Figma UI/UX designs into modular frontend components, ensuring complete mobile responsiveness and cross-browser consistency.

PROJECTS

MediStock – Full-Stack Pharmacy Inventory System — [Live Demo] [Code]

- Engineered a full-stack inventory platform using **React.js, Node.js, Express.js, and MongoDB**, featuring interactive inventory analytics, supplier management, and automated order processing workflows.
- Implemented custom **FEFO (First-Expiry-First-Out)** allocation algorithms with automated expiry tracking, low-stock alerts, and stock adjustments, significantly reducing inventory discrepancies and medicine wastage.
- Built secure **RESTful APIs** with **JWT authentication**, Role-Based Access Control (**RBAC**), and **Socket.IO** integration to deliver real-time inventory notifications and safeguard sensitive operations.

AgriYield – AI-Powered Smart Farming Platform — [Code]

- Developed a cross-platform smart farming mobile app using **React Native** and **Node.js**, featuring a bilingual (**English/Hindi**) interface and automated CI/CD pipelines via **GitHub Actions** and **Expo EAS**.
- Trained and deployed an **XGBoost** regression model served through **FastAPI** and containerized with **Docker**, predicting crop yields based on **14 soil and weather parameters**.
- Built secure **RESTful APIs** with **JWT authentication** in **Express.js**, integrating **OpenWeather** and **OGD India** datasets while caching historical predictions in **MongoDB** on **Render**.
